Dear Prof.Vimala,

needs back at the institute. I went through the Agenda and Notes that you mailed me and here are my comments for the consideration of the council. Although I was very much looking forward to participate in the Academic Council meeting, I am sorry that I could not come due to some pressing

First I would like to congratulate your team for a comprehensive agenda. The curriculum is well prepared and is on par with the syllabus of IIT's and

- 1. This comment is generic for all the degree program and for all disciplines. Overall the grading pattern seem to lopsided. The weightage of 75% for the final exam seem to place less emphasis on internals (Formative assessment). I believe that this would force the students to cram primarily for the end semester. The students would tend to place less emphasis for the internals which account for only 25%. Could this be made 40% - internals and 60% end semester. This way the formative and summative assessments will be nicely balanced.
- 2. I did not see a generic course on "Ecology and Environment" for all the undergraduate students. Are the concepts of ecology, sustainable development and environment covered in the course 12CY201??
- I do not see a course on "Probability and Statistics" or "Applied Statistics" listed in the undergraduate and post-graduate curriculum. Is it part of any math course. Knowledge on statistics is vital for M.E students. It is essential that the students have a better understanding of the subject for

I wish the Academic Council meeting all success.

Sincerely

Balaji
