## Awareness Programme on “No Plastic”

**Faculty In-charge** : Prof.R.Vaithianathan, AP/Chemistry

**Date** : 12 January 2022

**Gmeet Link** : <https://meet.google.com/qyj-vxes-mix>

The screenshot displays a Google Meet interface during an awareness program. The main window shows a presentation slide titled "SEA TURTLES" with a background image of a sea turtle. The slide contains the following text and statistics:

- 1,000 turtles** (at least) die each year from being tangled in plastic waste.
- Sea turtles often mistake floating plastic garbage for food. They can choke, sustain internal injury and die - or starve. Plastic can also create pockets of air in their gut, making diving difficult.
- 70%** of tagged turtles found dead in 2014 have eaten plastic.
- 52%** of all sea turtles have eaten plastic particles.

At the bottom left of the slide, it says "11 | 'NO PLASTIC' - NIS, OCE SALEM, 12.01.2022". The right side of the screen shows a grid of participant video thumbnails. The bottom of the screen features the Google Meet control bar with icons for mute, video, chat, and other functions.

## **Campus Overall Cleaning**

**Faculty In-charge** : Prof.R.Vaithianathan, AP/Chemistry

**Date** : 24 February 2022

**Place** : GCE, Salem
