**Research Policy**

**Aim:**

The principal objective of the Research Policy at the Government College of Engineering is to cultivate an environment characterized by research excellence and innovation, thereby fostering a setting where academic inquiry, knowledge creation, and ethical research practices are actively encouraged and supported among all institutional members.

**Goal:**

- Support faculty members, both Ph.D. enrolled and non-enrolled, in pursuing rigorous research activities, aiming to create a thriving academic environment.
- Provide comprehensive resources, mentorship, and academic network access to both full-time and part-time Ph.D. scholars, enabling significant contributions to their fields.
- Leverage diverse expertise within the institution to initiate interdisciplinary research efforts, addressing complex challenges through innovative solutions.
- Maintain the highest standards of integrity and responsibility in research, ensuring all activities are conducted ethically and in compliance with relevant guidelines.
- Aiming for publication in high-impact journals and presentations at esteemed conferences.
- To provide every possible financial support and Laboratory Support for research activities.
- Offer access to advanced laboratories, databases, and technological tools, supporting state-of-the-art research and innovation.

**Promotion of Research:**

The Government College of Engineering actively cultivates a research-driven culture through its dedicated Research Advisory Committee and Intellectual Patent Rights (IPR) Single Point of Contact (SPOC).

**Research Advisory Committee:** Comprises professors with significant research experience and Ph.D. qualifications. Provides guidance and support for the institution's research endeavors.

**Intellectual Property Rights (IPR) SPOC:** IPR Cell is an integral part of Institute's R&D Cell. It creates awareness among the Faculties, Research Scholars, and Students about importance of Intellectual Property Rights.
